

ROB ATTFIELD

+64 27 622 649 1

emailme@robertattfield.com

I am a *security-conscious* back-end *web developer*, with a growing appreciation for front-end development. I have *3 years commercial experience* as a web developer and specialize in *PHP, MySQL, HTML5, CSS3, and L.A.M.P stacks* overall. I am also a firm believer in *continual learning* and training, and regularly set aside time for personal development projects.

SKILLS

PHP, MySQL, HTML and Linux (using tools such as: vim, cron, memcache).	5 years

Java application development, with JUnit.	2 years
Ruby on Rails with Devise, e-commerce.	1 year

EXPERIENCE

Otago Regional Council

<http://orc.govt.nz>

Website Administrator

Dunedin, New Zealand

July to October 2017

Part-time/Temporary

I was hired here to cover extra workload and current employee's annual leave. This role primarily involved working with the wider communications team, and other units in the council, to provide accurate and up-to-date information on the council's website. This role also included updating Otago's Civil Defense Emergency Management website as needed – including content administration during significant events. Feedback from my involvement was very positive.

Sunny Side Up

<http://sunnysideup.co.nz/>

Contract Web Developer

Remote, New Zealand

May to July 2017

Part-time/Casual/Contract

This role involves working on Silverstripe-based projects on an as-required contract basis. Apart from dealing with this PHP-based framework, I also am involved in database and Linux-based server management, version control of source code.

Tuapeka Gold Print (Trading as Trends Collection)

<http://www.trendscollection.co.nz/>

I.C.T Technician

Dunedin, New Zealand

May - September 2016

Full-time position

My main role at Tuapeka Gold Print involved general computer and E.R.P system troubleshooting, maintenance of staff P.C's and devices, managing Office 365 Exchange portal, and working on an in-house Android application.

Eyemagnet

<https://eyemagnet.com>

Software Developer

Wellington, New Zealand

April - July 2015

Full-time position

During my time with Eyemagnet, I was tasked with developing Drupal-based websites. Extensive work with Laravel and Drupal was included in several projects, together with JavaScript-based libraries, HTML, and CSS. Managed front-end dependencies with development tools such as Bower, Grunt, and Node.js.

Seekom
<http://web.seekom.com>

Wellington, New Zealand
September to November 2014

Systems Developer

Full-time position

Maintained and developed a very complex legacy software solution of the core product. Extensive testing, debugging and developing patches was my main role. I primarily worked with the Zend Framework, Sentry, BugZilla, SVN, PostgreSQL, and Linux, during development.

Capstone Project
<https://project.ict.op.ac.nz>

Project
2013 - 2014

Web Developer / Project Manager

As part of the final year of my degree, I undertook a year-long industry project. The aim of this project was to gain experience working with a real client, while addressing real-world business problems and opportunities. The primary goal of my project was to increase energy literacy levels amongst residents of Dunedin, while also increasing their confidence levels to participate in energy-related discussions.
